2014 Trilateral Statistics

中日韩三国统计册 · 日中韓三国統計集 · 한중일3국통계집

Foreword

I am pleased to present the 2014 Trilateral Statistics, a selection of the most important and interesting statistics in the People's Republic of China, Japan and the Republic of Korea. When you are looking for the key facts and figures on current and emerging trends of economic, social and environmental development in the three countries, you will find this publication useful.

Since its establishment in 2011, the Trilateral Cooperation Secretariat (TCS) has been mandated to promote a better understanding of trilateral cooperation. Currently, there are 19 ministerial meetings and over 60 inter-governmental mechanisms among the three countries in various areas. From the intuitive charts and figures, you will realize how close the three countries are connected to each other.

I hope that the 2014 Trilateral Statistics will provide information of interest both for your work and your daily life, and give guidance for understanding the dynamic and close relations among the three countries as well.

Table of Contents

1. Quick Look

1-1. 2014 at a Glance	10
1-2. Regional Economies (2014)	11

2. Basic Indicators

2-1. Gross Domestic Product (GDP)	14
2-2. GDP Growth Rate	15
2-3. GDP per Capita	16
2-4. CPI (Consumer Prices Index)	17
2-5. Foreign Exchange Reserves	18
2-6. Balance of Payment	19

3. Population

3-1. Total Population	22
3-2. Growth Rate of Population	23
3-3. Population Density	24
3-4. Population in Urban and Rural Areas	25
3-5. Population Distribution by Age Group	28
3-6. Age Dependency Ratio	29
3-7. Population Estimates	30

4. Social Welfare

4-1. Total Fertility Rate	34
4-2. Aging Index	35
4-3. Average Life Expectancy	36
4-4. School Enrollment	37
4-5. Employment and Unemployment	40
4-6. Unemployment Rate	42

5. Trade

5-1. Trade Volumes	44
5-2. Trade Dependency	46
5-3. Trade Relations among the Three Countries (China)	47
5-4. Trade Relations among the Three Countries (Japan)	48
5-5. Trade Relations among the Three Countries (ROK)	49
5-6. Top 10 Export Markets	50
5-7. Revealed Comparative Advantage (RCA) Index	52
5-8. Merchandise Trade Balance	53
5-9. Top 10 Export Commodities of China	54
5-10. Top 10 Import Commodities of China	55
5-11. Top 10 Export Commodities of Japan	56
5-12. Top 10 Import Commodities of Japan	57
5-13. Top 10 Export Commodities of ROK	58
5-14. Top 10 Import Commodities of ROK	59
5-15. Bilateral Exports of China	60
5-16. Bilateral Imports of China	61
5-17. Bilateral Trade of China (Merchandise Detailed Products)	62
5-18. Bilateral Exports of Japan	63
5-19. Bilateral Imports of Japan	64
5-20. Bilateral Trade of Japan (Merchandise Detailed Products)	65
5-21. Bilateral Exports of ROK	66
5-22. Bilateral Imports of ROK	67
5-23. Bilateral Trade of ROK (Merchandise Detailed Products)	68

6. Investment

6-1. Foreign Direct Investment Inflows	70
6-2. Foreign Direct Investment Outflows	72
6-3. Foreign Direct Investment Inward Stocks	74
6-4. Foreign Direct Investment Outward Stocks	75
6-5. Doing Business Index of China	76
6-6. Doing Business Index of Japan	76

6-7. Doing Business Index of ROK	77
6-8 Doing Business Start-up Indicators	77
6-9 FDI Regulatory Restrictiveness Index	78

7. FTA

7-1. FTA of the Three Countries (Negotiation Concluded)	80
7-2. FTA of the Three Countries (Under Negotiation)	81
7-3. FTA of the Three Countries (Under Discussion)	82

8. Finance

*At current prices

** GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars. Dollar figures for GDP are converted from domestic currencies using single year official exchange rates.

* Age dependency ratio is the ratio of dependents (people younger than 15 or older than 64) to the working-age population, those ages 15-64. Data are shown as the proportion of dependents per 100 working-age population. $\{(Y\text{ounger than } 15 \text{ or Older than } 64)/W\text{orking population, ages } 15-64\} * 100$

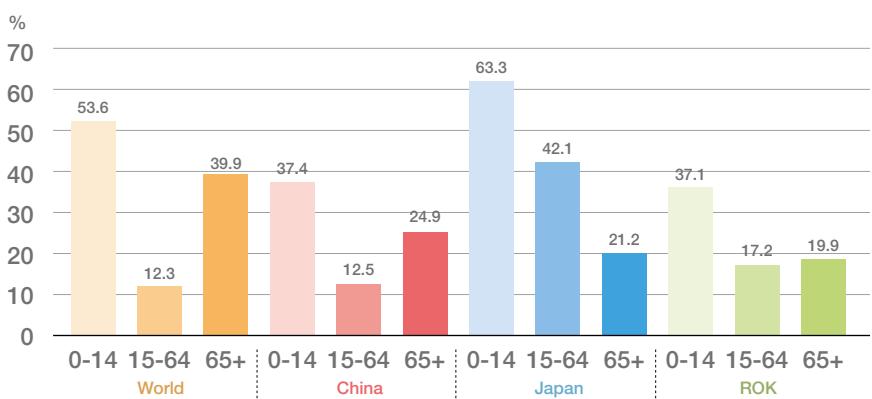

** Age dependency ratio, old, is the ratio of older dependents--people older than 64 (to the working-age population) to those ages 15-64. $(O\text{lder than } 64/W\text{orking population, ages } 15-64) * 100$

*** Age dependency ratio, young, is the ratio of younger dependent (people younger than 15) to the working-age population--those ages 15-64. $(Y\text{ounger than } 15/W\text{orking population, ages } 15-64) * 100$

* Gross enrollment ratio is the ratio of total enrollment, regardless of age, to the population of the age group that officially corresponds to the level of education shown.

**Preprimary education refers to the initial stage of organized instruction, designed primarily to introduce very young children to a school-type environment.

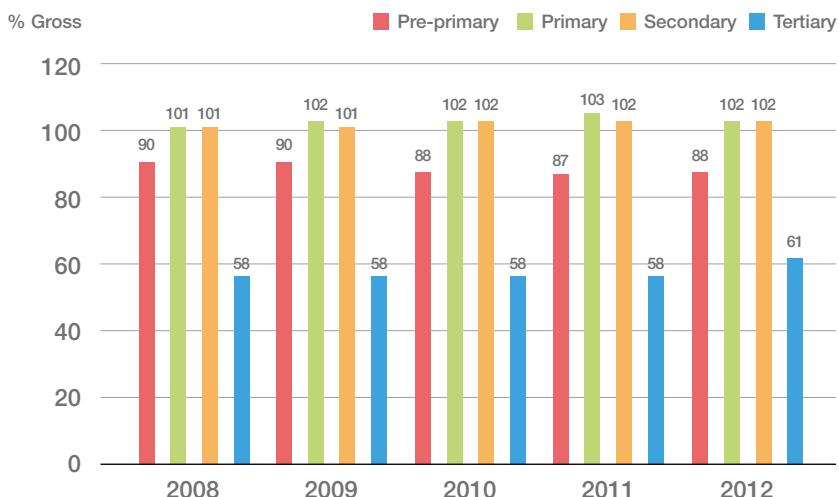

*** Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music.

* Total production of energy refers to the quantities of fuels extracted from the ground after the removal of inert matter or impurities (e.g. sulphur from natural gas). For non-combusted energy such as nuclear, hydro and solar, the primary energy equivalent is calculated using the physical energy content method, which expresses the energy content of each source in million tons of oil equivalent (Mtoe) energy.

* Crude oil is a mixture of hydrocarbons that exists as a liquid in natural underground reservoirs and remains liquid when brought to the surface. Petroleum products are produced from the processing of crude oil at petroleum refineries and the extraction of liquid hydrocarbons at natural gas processing plants. Petroleum is the broad category that includes both crude oil and petroleum products.

Coal Consumption

Unit: Thousand Short Tons

The chart shows a steady increase in total coal consumption over the five-year period. China's consumption grows from approximately 3,200,000 thousand short tons in 2008 to about 4,100,000 in 2012. Japan's contribution is minimal, starting at around 100,000 in 2008 and rising slightly to 200,000 in 2012. The ROK's share is negligible, appearing only as a thin green layer at the top of the bars.

Year	China (kST)	Japan (kST)	ROK (kST)	Total (kST)
2008	3,200,000	100,000	0	3,300,000
2009	3,300,000	150,000	0	3,450,000
2010	3,400,000	200,000	0	3,600,000
2011	3,500,000	250,000	0	3,750,000
2012	3,600,000	300,000	0	3,900,000

Total Petroleum Consumption

Unit: Thousand Barrels per Day

The chart displays a consistent upward trend in total petroleum consumption from 2010 to 2014. China's consumption increases from roughly 9,000 barrels per day in 2010 to about 11,000 in 2014. Japan's share grows from approximately 3,500 barrels per day in 2010 to nearly 4,000 in 2014. The ROK's contribution is relatively small, increasing from about 200 barrels per day in 2010 to around 300 in 2014.

Year	China (kBD)	Japan (kBD)	ROK (kBD)	Total (kBD)
2010	9,000	3,500	200	12,700
2011	9,500	3,800	250	13,550
2012	10,000	4,000	300	14,300
2013	10,500	4,200	350	14,950
2014	11,000	4,500	300	15,800

Human Development Index (HDI)

	China	Japan	ROK
2008	0.682	0.881	0.874
2010	0.701	0.884	0.882
2011	0.71	0.887	0.886
2012	0.715	0.888	0.888
2013	0.719	0.890	0.891

* The Human Development Index (HDI) is a summary measure of human development. It measures the average achievements in a country in three basic dimensions of human development: a long and healthy life (health), access to knowledge (education) and a decent standard of living (income). Data availability determines HDI country coverage. To enable cross-country comparisons, the HDI is, to the extent possible, calculated based on data from leading international data agencies and other credible data sources available at the time of writing.

Pursuant to the Agreement on the Establishment of the Trilateral Cooperation Secretariat (TCS) signed by the governments of the People's Republic of China (China), Japan and the Republic of Korea (ROK) in December 2010, the TCS was established as an international organization in September 2011 in Seoul.

The TCS is mandated to promote cooperation and co-prosperity among the three countries. The primary mandate is to support the trilateral consultative mechanisms including providing reference to newly established mechanisms. We also aim to become the hub of the trilateral cooperation by organizing multiple projects and events. Additionally, we conduct researches, explore new initiatives and promote public understanding of the trilateral cooperation.
